Health and Safety Policy

It is the policy of the company to comply with OHSAS18001 and the terms of the Health and Safety at Work etc. Act 1974 and related legislation plus all applicable Network Rail and LUL/TLL disciplines and to provide, so far as is reasonably practicable a healthy and safe working environment. The company health and safety objective is to minimise the number of instances of occupational accidents and illnesses and ultimately to achieve an accident-free workplace.

All employees will be provided with such equipment, information, training and supervision as is necessary to implement the policy and achieve the stated objective.

The company recognise and accept their duty to protect the health and safety of all visitors to the company, including contractors and temporary employees, as well as any members of the public who might be affected by our operations.

While the management of the company will do all that is within its powers to ensure the health and safety of its employees, it is recognised that health and safety at work is the responsibility of each and every individual associated with the company. It is the duty of each employee to take reasonable care of their own and other people's welfare and to report any situation which may pose a threat to the wellbeing of any other person.

The management of the company will provide every employee with the training necessary to carry out their tasks safely. However if an employee is unsure how to perform a certain task or feels it would be dangerous to perform a specific job then it is the employee's duty to report this to their supervisor or the Director of Safety. An effective health and safety programme requires continuous communication between employees at all levels. It is therefore every employee's responsibility to report immediately any situation which could jeopardise the wellbeing of themselves or any other person.

All injuries, however small, sustained by a person at work must be reported to the Director of Safety or a delegated representative. Accident records are crucial to the effective monitoring and revision of the policy and must therefore be accurate and comprehensive.

The company health and safety policy will be continually monitored and updated, particularly when changes in the scale and nature of our operations occur. The policy will be reviewed and updated every periodically and when there are legislative changes.

The specific arrangements for the implementation of this policy and the personnel responsible are detailed in our H&S policy manual MB-AHL-02.
